Education

California State University, Fullerton — Fullerton, CA

B.S. in Computer Science — *May 2026*

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, Machine Learning, Applied AI, Artificial Intelligence, System Design, Operating Concepts

Experience

Manager — Aug. 2026 – Present

79 Nails and Hair — *Fullerton, CA*

- Owns full daily operations for a high-traffic salon end-to-end – staff rotation, cash flow, customer complaints, staff supervision, and healthcare-grade cleanliness standards – trusted to operate independently, reporting to the owner only 2–3x/week since promotion from Assistant Manager

Assistant Manager — 2023 – Aug. 2026

79 Nails and Hair — *Fullerton, CA*

- Managed daily operations, staff scheduling, and customer service for 3 years, earning promotion to Manager through consistently reliable execution under pressure

Projects

79 Nails & Hair Booking Platform | *Next.js, PostgreSQL, Claude API, Docker* — 2026

- Built a real-time booking platform for a real business, guaranteeing no double-booking at the database level via a Postgres exclusion constraint, not an app-level check a race condition could slip past
- Shipped a Claude-powered natural-language search where every AI-returned result is re-validated against the live database before reaching a user, so a hallucinated result can never reach production
- Hardened the platform with Row Level Security on every table and CI (lint, typecheck, test, build) gating every deploy; 26 automated tests and a 100/100 Lighthouse score for accessibility, best practices, and SEO

Turn Rotation – Staff Fairness Engine | *PostgreSQL, AWS Amplify, Textract* — 2026

- Engineered a concurrency-safe rotation engine using atomic PostgreSQL functions and optimistic concurrency
- Manually validated ˜350 real assignments, traced a 2% error rate to two real bugs, reproduced each with a failing test, and shipped fixes to production the same day
- Set up CI running PostgreSQL in Docker for 53 automated tests on every push

Employee Task Manager | *Node.js, Express, React, Firestore, Socket.IO* — In Progress

- Built an 18-endpoint Express REST API with role-based owner/employee access, JWT auth, bcrypt-hashed passwords, and phone OTP login with expiry, attempt limits, and request cooldowns
- Used Firestore transactions to enforce unique emails and usernames and single-use, 24-hour invite links, rolling back a new account if its invitation fails to send
- Built React owner and employee dashboards for employee, task, and chat management, with live task updates over JWT-authenticated Socket.IO

Technical Skills

Languages: Python, JavaScript/TypeScript, SQL, C++, C#
Frameworks: Next.js, React, Node.js, Express, Socket.IO, FastAPI, Flask, Anthropic Claude API
Databases: PostgreSQL (Supabase, Row Level Security), Firebase Firestore, MySQL, SQL Server
Developer Tools: Git, GitHub Actions (CI/CD), Docker, Vitest, Sentry, Zod, Vercel, VS Code, AWS Amplify
