EDUCATION

California State University, Fullerton

Fullerton, CA

B.S. in Computer Science

May 2026

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, Machine Learning, Applied AI, Artificial Intelligence, System Design, Operating Concepts

EXPERIENCE

Manager

Aug. 2026 – Present

79 Nails and Hair

Fullerton, CA

- Owns full daily operations for a high-traffic salon end-to-end – staff rotation, cash flow, customer complaints, staff supervision, and healthcare-grade cleanliness standards – trusted to operate independently, reporting to the owner only 2–3x/week since promotion from Assistant Manager

Assistant Manager

2023 – Aug. 2026

79 Nails and Hair

Fullerton, CA

- Managed daily operations, staff scheduling, and customer service for 3 years, earning promotion to Manager through consistently reliable execution under pressure

PROJECTS

79 Nails & Hair Booking Platform | *Next.js, TypeScript, PostgreSQL, Claude API*

2026

- Designed, built, and launched a production booking platform end-to-end for a real business – schema, API layer, and UI – guaranteeing no double-booking at the database level via a Postgres exclusion constraint, not an app-level check a race condition could slip past
- Shipped a Claude-powered natural-language search API where every AI-returned result is re-validated against the live database before reaching a user, so a hallucinated result can never reach production
- Gated every deploy on CI (lint, typecheck, 26 automated tests, build) and hardened with Row Level Security on every table; 100/100 Lighthouse score for accessibility, best practices, and SEO

Turn Rotation – Staff Fairness Engine | *TypeScript, PostgreSQL, AWS Amplify*

2026

- Designed and launched a concurrency-safe backend service managing a live rotation queue, using atomic PostgreSQL functions and optimistic concurrency instead of app-level checks a race condition could slip past
- Integrated AWS Textract into the ingestion pipeline to turn uploaded price lists into manager-reviewed catalog data
- Found a 2% error rate across ~350 real assignments, root-caused it to two distinct bugs, and shipped both fixes to production the same day with regression tests in CI

DataChat – Natural Language CSV Queries | *Python, Flask, GPT-4o-mini, SQLite*

2026

- Built and launched a Python API service that converts natural-language questions into SQL, executes them, and explains results in plain English via a two-LLM-call pipeline
- Iterated the design across 3 versions against a labeled evaluation suite, improving accuracy from 66.7% to 100%, and added a self-correction loop that auto-fixes failed queries from execution errors

TECHNICAL SKILLS

Languages: Python, TypeScript/JavaScript, SQL, C++, C#

Frameworks & APIs: Next.js, React, FastAPI, Flask, Strapi, Anthropic Claude API, OpenAI GPT-4o-mini

Databases: PostgreSQL (Supabase, Row Level Security), MySQL, SQL Server

Developer Tools: Git, GitHub Actions (CI/CD), Docker, Vitest, Sentry, Zod, Vercel, AWS Amplify
