EDUCATION

California State University, Fullerton

Fullerton, CA

B.S. in Computer Science

May 2026

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, Machine Learning, Applied AI, Artificial Intelligence, System Design, Operating Concepts

EXPERIENCE

Manager

Aug. 2026 – Present

79 Nails and Hair

Fullerton, CA

- Owns full daily operations for a high-traffic salon end-to-end – staff rotation, cash flow, customer complaints, staff supervision, and healthcare-grade cleanliness standards – trusted to operate independently, reporting to the owner only 2–3x/week since promotion from Assistant Manager

Assistant Manager

2023 – Aug. 2026

79 Nails and Hair

Fullerton, CA

- Managed daily operations, staff scheduling, and customer service for 3 years, earning promotion to Manager through consistently reliable execution under pressure

PROJECTS

Turn Rotation – Staff Fairness Engine | *PostgreSQL, AWS Amplify*

2026

- Engineered a concurrency-safe rotation engine using atomic PostgreSQL functions and optimistic concurrency, so correctness holds under simultaneous requests rather than relying on app-level checks
- Manually validated ~350 real assignments, traced a 2% error rate to two real bugs, reproduced each with a failing test, and shipped fixes to production the same day
- Set up CI running PostgreSQL in Docker for 53 automated tests on every push

79 Nails & Hair Booking Platform | *Next.js, PostgreSQL, Docker*

2026

- Built a real-time booking platform for a real business, guaranteeing no double-booking at the database level via a Postgres exclusion constraint, not an app-level check a race condition could slip past
- Hardened the platform with Row Level Security on every table and CI (lint, typecheck, test, build) gating every deploy; 26 automated tests and a 100/100 Lighthouse score for accessibility, best practices, and SEO

House Price & Disease Prediction | *Python, scikit-learn, pandas*

2025

- Built and compared regression and classification models across two prediction tasks: house price estimation and heart disease diagnosis
- Improved classification accuracy from 78% to 85% through systematic hyperparameter tuning
- Ran a full evaluation suite (accuracy, confusion matrix, MAE, RMSE, R^2) to validate model quality before comparing approaches

TECHNICAL SKILLS

Languages: Python, C++, C#, JavaScript/TypeScript, SQL

Frameworks: Next.js, React, FastAPI, Flask, scikit-learn, TensorFlow/Keras

Databases: PostgreSQL (Supabase, Row Level Security), MySQL, SQL Server

Developer Tools: Git, GitHub Actions (CI/CD), Docker, Vitest, Sentry, Vercel, AWS Amplify
