EDUCATION

California State University, Fullerton

Fullerton, CA

B.S. in Computer Science

May 2026

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, Machine Learning, Applied AI, Artificial Intelligence, System Design, Operating Concepts

EXPERIENCE

Manager

Aug. 2026 – Present

79 Nails and Hair

Garden Grove, CA

- Owns full daily operations for a high-traffic salon end-to-end – staff rotation, cash flow, customer complaints, staff supervision, and healthcare-grade cleanliness standards – trusted to operate independently, reporting to the owner only 2–3x/week since promotion from Assistant Manager

Assistant Manager

2023 – Aug. 2026

79 Nails and Hair

Garden Grove, CA

- Managed daily operations, staff scheduling, and customer service for 3 years, earning promotion to Manager through consistently reliable execution under pressure

PROJECTS

Turn Rotation – Staff Fairness Engine | *PostgreSQL, AWS Amplify, Docker*

2026

- Popped open the hood on a system that looked correct in tests but wasn't: manually validated ~350 real assignments to see what was actually happening
- Formed a hypothesis, tested it, and traced a 2% error rate to two exact root causes; wrote a failing test for each before fixing it, so it couldn't break the same way again
- Shipped both fixes to production the same day; CI runs PostgreSQL in Docker for 53 automated tests on every push, deployed on AWS

79 Nails & Hair Booking Platform | *Next.js, PostgreSQL, Claude API, Docker*

2026

- Built and deployed a real-time production system on Docker for a real business, not a class project
- Instrumented the platform with Sentry monitoring to catch issues before users report them, and CI (lint, typecheck, test, build) gating every deploy
- Guaranteed no double-booking at the database level via a Postgres exclusion constraint, not an app-level check a race condition could slip past

DataChat – Natural Language CSV Queries | *Python, OpenAI GPT-4o-mini, SQLite, pandas*

2026

- Built a self-correction loop that catches SQL execution errors and automatically retries with the error fed back into the model, instead of just failing
- Tested hypotheses about what was going wrong across 3 prompt iterations against a labeled evaluation suite, improving accuracy from 66.7% to 100%

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL, C++, C#

Frameworks: Next.js, React, FastAPI, Flask, Strapi, Anthropic Claude API, OpenAI GPT-4o-mini

Databases: PostgreSQL (Supabase, Row Level Security), MySQL, SQL Server

Developer Tools: Git, GitHub Actions (CI/CD), Docker, Vitest, Sentry, Zod, Vercel, VS Code, AWS Amplify
