## EDUCATION

### California State University, Fullerton

Fullerton, CA

*B.S. in Computer Science*

*May 2026*

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, Machine Learning, Applied AI, Artificial Intelligence, System Design, Operating Concepts

## EXPERIENCE

### Manager

Aug. 2026 – Present

*79 Nails and Hair*

*Garden Grove, CA*

- Owns full daily operations for a high-traffic salon end-to-end – staff rotation, cash flow, customer complaints, staff supervision, and healthcare-grade cleanliness standards – trusted to operate independently, reporting to the owner only 2–3x/week since promotion from Assistant Manager

### Assistant Manager

2023 – Aug. 2026

*79 Nails and Hair*

*Garden Grove, CA*

- Managed daily operations, staff scheduling, and customer service for 3 years, earning promotion to Manager through consistently reliable execution under pressure

## PROJECTS

### 79 Nails & Hair Booking Platform | *Next.js, PostgreSQL, Claude API, Docker*

2026

- Owned a real product start to finish for an actual business with real users, not a class project: design, build, ship, and support
- Made and defended real technical tradeoffs, choosing a Postgres exclusion constraint over an app-level check to guarantee no double-booking at scale
- Shipped a Claude-powered natural-language search built user-first, re-validating every AI result against the live database before it reaches someone so it never shows a made-up answer

### Turn Rotation – Staff Fairness Engine | *PostgreSQL, AWS Amplify, Textract*

2026

- Shipped fast under real constraints: traced a 2% error rate in a live system to two real bugs, reproduced each with a failing test, and shipped fixes to production the same day
- Engineered a concurrency-safe rotation engine using atomic PostgreSQL functions and optimistic concurrency to handle real concurrent requests
- Set up CI running PostgreSQL in Docker for 53 automated tests on every push, keeping shipping fast without breaking things

### DataChat – Natural Language CSV Queries | *Python, OpenAI GPT-4o-mini, SQLite, pandas*

2026

- Picked up prompt engineering and LLM evaluation from scratch, iterating across 3 versions against a labeled evaluation suite to take accuracy from 66.7% to 100% on 12 test cases
- Built a two-LLM-call pipeline with a self-correction retry loop that automatically fixes failed SQL queries without manual intervention

## TECHNICAL SKILLS

**Languages:** Python, JavaScript/TypeScript, SQL, C++, C#

**Frameworks:** Next.js, React, FastAPI, Flask, Strapi, Anthropic Claude API, OpenAI GPT-4o-mini

**Databases:** PostgreSQL (Supabase, Row Level Security), MySQL, SQL Server

**Developer Tools:** Git, GitHub Actions (CI/CD), Docker, Vitest, Sentry, Zod, Vercel, VS Code, AWS Amplify
