EDUCATION

California State University, Fullerton

Fullerton, CA

B.S. in Computer Science

May 2026

- Dean's Honor List: Fall 2025, Spring 2026
- Relevant Coursework: Data Structures, Algorithms Engineering, Software Engineering, System Design, Operating Concepts

PROJECTS

Turn Rotation – Concurrency-Safe Fairness Engine | *Next.js, PostgreSQL, Amplify*

2026

- Manually audited about 350 real rotation assignments against the fairness rules (98% correct), traced the 2% error rate to two specific logic bugs, reproduced each with a failing test, and shipped fixes the same day
- Built a concurrency-safe staff rotation queue handling about 50 assignments/day, using atomic Postgres functions with optimistic concurrency to guarantee fair turns under simultaneous requests
- Ran CI with PostgreSQL in Docker for 53 automated tests on every push, verified with mutation testing; deployed via AWS Amplify with Textract-assisted menu import behind a manager-review gate

79 Nails & Hair Booking Platform | *Next.js, PostgreSQL, Claude API*

2026

- Shipped a live booking platform serving a 7-stylist salon with 41 services; prevented double-booked appointments at the database level with a Postgres exclusion constraint, not an app-level check a race condition could slip past
- Found and patched a stored-HTML-injection vulnerability in outbound customer emails before it reached production
- Gated 18+ production deploys behind CI (lint, typecheck, test, build) and 26 automated tests; 100/100 Lighthouse score for accessibility and SEO

E-Commerce Platform | *React, Redux Toolkit, Strapi*

2025

- Built a full-stack e-commerce platform on a 3-person team: React/Redux Toolkit frontend, Strapi headless CMS, and MySQL database, deployed to production
- Implemented Stripe checkout, authentication, and inventory/order management, backed by Jest and Supertest tests, with regular code review across the team

EXPERIENCE

Manager

Aug. 2026 – Present

79 Nails and Hair – promoted from Assistant Manager (2023 – Aug. 2026)

Garden Grove, CA

- Run daily operations for a 7-person salon – staff rotation, scheduling, and cash reconciliation – reporting to the owner only 2–3x/week
- Identified real scheduling and turn-fairness problems on the floor and built the booking platform and rotation engine described under Projects

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, SQL

Frameworks: Next.js, React, Redux Toolkit, Strapi

AI: Anthropic Claude API

Databases: PostgreSQL (Supabase, Row Level Security), MySQL

Developer Tools: Git, GitHub Actions (CI/CD), Docker, Vitest, Jest, Sentry, Vercel, AWS Amplify
